## **DETAILED ACTION**

### ***Procedural Status***

This action is in response to applicant's communication received on 23 June 2004. The current examiner has reviewed the documents associated with the prosecution in this case, and in view of the brief filed on said date above, and in light of the entirety of the prosecution, the examiner must respectfully deny applicant's request for reinstatement of appeal, and reopen prosecution.

### ***Status of Claims***

The last set of amended claims, received 24 June 2003, indicates that claims 1-2 & 7 are amended, claims 83-86 are new, and Claims 3-6 & 8-82 are as originally submitted. Claims 1-86 are therefore currently pending.

### ***Election/Restrictions***

The current examiner has reviewed the application and claims, and respectfully submits that although prosecution in this application has been lengthy, the claims are of such distinctiveness and complexity that further prosecution would without restriction would require additional, unproductive time-consuming search and analysis. Thus, restriction to one of the following inventions is required under 35 U.S.C. 121:

1. Claims 1-54 and 83-86, drawn to an automatic transaction machine and method, classified in class 902, subclasses 13,23.
2. Claims 55-82, drawn to a method, classified in class 902, subclasses 13,23 and class 705, subclass 39,43.

The inventions are distinct, each from the other because of the following reasons:

Art Unit: 3624

Inventions 1 and 2 are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the process requires only that a machine, deliver either cash or digital content, but not both. Since there are a variety of ways of dispensing cash or digital content from various types of machines, these method steps can be performed by another apparatus.

Because these inventions are distinct for the reasons given above and the search required for Group 1 is not required for Group 2, restriction for examination purposes as indicated is proper.

### ***Reminders***

No telephone communication was placed regarding this election due to the complex nature of this application and election. See MPEP §812.01.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Applicant is reminded that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 3624

Applicant is reminded that a shortened statutory period for response to this action is set to expire 30 (thirty) days from the mail date of this letter. Failure to respond within the period for response could possibly result in abandonment of the application. See 35 U.S.C 133, MPEP §'s 710.02, 710.02(b).
